

# UP CLOSE DREAMWORKS REMODELING

Michael Park grew up on the job site working alongside his father who was a general contractor. “I guess that’s where I fell in love with cabinetry. ‘My Dad would say, ‘Pay attention, it’s all in the details.’ He taught me that no dollar saved is ever worth a dissatisfied customer,” explains Park. Dreamworks Remodeling has proudly been designing, supplying, and installing kitchen and bathroom cabinetry and complete residential renovations for over 26 years.

Owner Michael Park and his team work directly with homeowners, contractors, architects and interior designers to create unforgettable designs. Their creative design staff is among the most experienced and talented in the Southwest Florida area. Dreamworks will guide you through the design process of your project, and stand by you through to project completion. The Dreamworks team believes in helping to educate its customers on what materials and options are available, providing multiple options to bring beauty and functionality together. Not too many business owners can say that they will be directly working with the clients on every job they do. But Michael Park does. As owner of Dreamworks Remodeling, he is personally involved on every job from start to finish.
